Fall 2020

PRESIDENT'S CORNER

Hello Everyone,

With the holiday season in full swing and the pandemic showing no signs of slowing down, I hope everyone is able to take some time for themselves.

This season is already difficult and busy without a pandemic. I want you to know OAVT is still active and is here for you.

Even though we made the difficult decision to cancel 2020 Discovery, we are still planning on having the conference in 2021.

But of course everything will depend on what is happening with the pandemic at that time.

Happy Holidays and hopefully the New Year will be a joyous and fruitful year.

Kingsly Berlin

President

NEXT OAVT BOARD MEETING

Sunday – January 10, 2021

11:00am

Phone Conference

*****CHECK IT OUT*****

On this podcast cast OVMA's executive director Jack Advent gives a brief overview on how the OVMA is expecting the 2021 Midwest Veterinary Conference to look like.

Mr. Advent answers several questions that are on everyone's mind.

Such as, fees. Scheduling lectures and YES! Even a virtual exhibit hall!

Check it out!

MIDWEST VETERINARY CONFERENCE

Next year, the Midwest Veterinary Conference will be hosted on a web-based platform.

What does that mean for the fifth-largest vet convention in North America?

Find out on today's episode of Fully Vetted Podcast!

<https://buff.ly/35YDcZo>

MEDVET LECTURE SERIES

Looking for CE. Check out Medvet's website for their lectures on Zoom.

You sign up for the lecture you want. They emailed you confirmation information.

They emailed you reminders of your chosen lecture the week before,
the week of, and even up to an hour before it begins on Zoom
just in case you are super busy at home or
work and totally forget to sit down.

For those of you saying "I have no idea how Zoom works"

just follow the links they give you it is easy!

Within 1 week of attending the lecture they email
you your participation certificate.

THINGS TO PONDER

2020 will certainly be a year to remember-the good, the bad, and the ugly! It has been two years now since I gave the OAVT Executive Board my resignation intent to retire at the close of Discovery 2020. I felt that I owed this association the time to transition and find someone or some entity to lead the OAVT into the future. Time waits for no one and life brings many changes and curve balls to try to trip you up.

Two years ago, my husband, Ken, and I discussed relocating after he retired to be closer to our grandchildren and do some traveling that still exists on our bucket list. As many of you know, my home address and phone number have been the Associations since our previous executive secretary, Barbara Madison, passed away. It has worked well, as I became the executive secretary, I was able to forward mail on to its destination, personally handle questions about our profession and direct them on to people that could help if I was not able.

I consider it a privilege to be working with such dedicated technicians, who all have a million things on their plate but continue to give their service to the OAVT. Things were going quite well until COVID-19 reared its ugly head and turned this world upside down. Certainly, the Association had to adjust-we hold board meetings by teleconference and the most difficult decision was to cancel Discovery (the first time ever). But we continue on.

My home sold without even being on the market, we bought a new home only 18 miles from the grandkids and have been living here since Halloween! What changes will you see with the OAVT – nothing more than a new address! We have a post office box for our mailing address, but we are still very accessible to anyone for anything.

I have agreed to continue as Executive Secretary until the Board finds or appoints someone. I stay involved for many reasons but the main one is my dedication to the profession. I chose this profession 46 years ago when I made that decision to attend Columbus Technical Institute (now known as Columbus State Community College for you “young-ens”) and study veterinary technology. Back then I had only two choices of colleges that offered such a program, Columbus and Cincinnati. Before long, Ohio had three colleges that offered veterinary technology programs and today there are NINE AVMA accredited programs (and this does not include the distance learning programs that are available).

I know that I would not be where I am today if I would not have gotten involved early on in the formation of the association and served on committees within the OVMA. I feel that I have one of the most versatile degrees available and it has opened the door into many different job opportunities. I feel I have grown both personally and professionally over my career and attribute many of my successes to the OAVT.

The following are some questions I would like you, as a registered veterinary technician, to consider and if you have a moment, share your ideas/experiences with me. I am always willing to consider new ideas and interests as that is what brings growth.

- What were the factors that influenced you to become a veterinary technician?
- What do you consider to be your greatest contribution and accomplishment in your career thus far?
- Do you volunteer or have any civic or service-oriented activity outside of your job?
- What have you done to strengthen and improve the veterinary profession?

I hope you all have a safe and healthy holiday season. I hope to hear from you soon!

Sincerely,
Janet Buck, RVT
Executive Secretary OAVT

NAVIGATING THE VETERINARY TECHNICIAN CREDENTIAL CONVERSATION

With multiple avenues to attaining a veterinary technician credential in the United States, it's time for standardization.

The NAVTA Corner has focused on standardizing veterinary technician credentials in the past (“The Need for a Standard in Veterinary Technician Credentials,” Fall 2018), indicating that the term “veterinary technician” means different things depending on the state in which you work. While some states restrict the use of the title “veterinary technician” to those who have met a formal veterinary technology educational requirement, some do not regulate its use and allow individuals without formal veterinary technology education to be called and/or credentialed as a veterinary technician.

This creates an issue regarding title nomenclature between a credentialed veterinary technician, veterinary assistant, or an individual who has no previous experience or formal education in veterinary nursing and technology. As such, the standardization of credentials throughout the United States has been a focus for advocates.

“There are many credentialed veterinary technicians who benefit from the merit of their education while there are also many seasoned veterinary assistants who excel at their role and developed their skillsets prior to licensing regulations being established in their state.”

The conversation regarding the value of a credentialed veterinary technician versus a non-credentialed veterinary technician (or, legally, veterinary assistant in many states) is often heated. There are many credentialed veterinary technicians who benefit from the merit of their education while there are also many seasoned veterinary assistants who excel at their role and developed their skillsets prior to licensing regulations being established in their state. The comparison is not as simple as trying to conclude one member of the team is more valuable than the other.

It is also true that credentialed veterinary technicians in the field currently have different paths through which they obtained their credentials, which adds more depth to the discussion of the current state of our profession. The methods of obtaining credentialing in the U.S. can be sorted into several broad categories:

- **Formal education with national examination:** These credentialed members have obtained an associate or bachelor's degree in veterinary technology or veterinary nursing from an AVMA- or CVMA-accredited program and have passed the AAVSB Veterinary Technician National Examination (VTNE). This is considered the current standard.
- **Alternative pathway credentialing with national examination:** Several states permit the ability for individuals to qualify to take the VTNE by completing a required set of veterinary coursework, required work hours, other degrees related to veterinary medicine, or a combination of factors.
- **Formal education with state-instituted examination:** There was a time where state veterinary medical boards were instituting their own licensing exam. The AVMA-accredited program graduates at the time would often take the VTNE as well as the state examination, though some opted to take only the state exam. This no longer happens because all states have adopted the VTNE.
- **Alternative pathway credentialing with state examination:** This was achieved by those who had fulfilled alternative pathway requirements permitted by their state and passed the state-instituted exam, making them credentialed in the specific state. This no longer happens because all states have adopted the VTNE.
- **Grandfathered:** Historically, at the time licensure was established in a state, those already in the line of work who met certain requirements would obtain the credentials. This pathway was and is only available for a limited time when state regulation is established.

It's clear that we have different kinds of credentialed veterinary technicians in the field. One may ask, "Isn't it simpler to have it all be the same? How and why is this the case?" The answer to the first question is likely "Yes." Having a nationally standardized credentialing system will standardize the baseline of knowledge with which members of the profession enter the field, helping veterinary technicians/veterinary nurses keep up with the demands in the knowledge required.

The answer to the second question is a little more complicated. The differences exist because the profession has spent the last 50 to 60 years being developed, and all professions that become licensed and standardized go through a similar process. As new standards are implemented, those already in the field cannot simply be disqualified from working as a credentialed veterinary technician. Imagine what that would do to the number of people able to work in this capacity, subsequent hardship to veterinary practices, and detriment to patient care that would result.

"Having a nationally standardized credentialing system will standardize the baseline of knowledge with which members of the profession enter the field, helping veterinary technicians/veterinary nurses keep up with the demands in the knowledge required."

But new standards are upheld as limited eligibility windows are closed or as new individuals enter the profession. Each of the 50 states goes through this process, which lengthens the time it takes for standardization of our credentials. Alternative pathways exist because legislators can pass in-state regulations that allow veterinary medical boards to grant licenses based on what they deem meets the quality requirement of the licensees. There are various reasons why some states established and keep alternative pathways, but the shortage of veterinary technicians is likely one pressure that makes conversations regarding removal of these paths difficult.

It is often an unproductive debate when members of the profession try to compare and contrast the different credentialing pathways and assign an order of superiority or ability. There are veterinary technicians of all levels of experience, expertise, and competency that come from all categories. There are certainly individuals who have decided to go back to school to obtain a veterinary technology or nursing degree and pass the VTNE to meet current standards. There are those who realize that is not feasible with current family, life, financial, or career situations, but contribute to establishing these new standards and support others in obtaining them. So—like it or not—here we are today with all sorts of individuals as a part of our profession. Do we want to continue to squabble internally through a "who's better than who" debate, or do we want to band together and make change happen?

We are all aiming to elevate the profession and agree that standardizing the credentials is the way forward, leading to better consistency, recognition, mobility and reciprocity, and title protection. We can and must work together to achieve our goals—for the good of the profession and the patients for whom we care.

WAIVER OF LIMIT OF ONLINE CE HOURS

On March 14, 2020, an Executive Order declaring a state of emergency due to COVID19 was issued.

As a result, numerous live continuing education opportunities were cancelled or developed into webinars or online continuing education events.

The Ohio Veterinary Licensing Board hereby enacts this Resolution to permit unlimited continuing education hours to be obtained online in order to meet the requirements for renewal of a veterinary, limited veterinary, or registered veterinary technician license.

This resolution shall remain in effect for the current renewal cycles of 2021 and 2022.

Dated: July 8, 2020

<http://ovmlb.ohio.gov/pdfs/COVID-19%20and%20online%20CE%20hours.pdf>

RVT RENEWAL EXTENDED

RVT licenses typically expire on March 1, 2021.

However, recently enacted COVID legislation extended the expiration date until July 1, 2021 for this renewal period only.

RVTs can renew anytime between January through July 1, 2021 at the regular renewal fee of \$35.00 via credit card.

There is also a \$3.50 processing fee assessed by the State of Ohio. Late fees are assessed immediately after the expiration date of July 1st.

ALL License renewal communications will be sent via email notification only. It is important to notify the Board of any email changes!

Instructions for the ELicensing system are on the Board's web site. No paper applications or checks will be accepted.

Reminder: All ten hours of required continuing education can be obtained through online CE opportunities.

Ohio Veterinary Medical Licensing Board

TECHNICIAN OF THE YEAR AWARD

Nominations for this award will be accepted until December 31 2020.

Please refer to website for instructions and form to nominate your technician of the year!

MISSION STATEMENT

The Ohio Association of Veterinary Technicians is dedicated to promoting Veterinary Technicians and quality animal healthcare through education, legislation and high ethical standards.

The goals of the Ohio Association of Veterinary Technicians:

1. To promote the professional and educational advancement of Ohio's Veterinary Technicians
2. To enlarge the technician's knowledge of necessary skills through continuing education programs and sponsored seminars
3. To provide information on job opportunities
4. To maintain and improve the professional standards of technician's practice
5. To foster high ethical standards within our profession
6. To promote the interest of Veterinary Technicians through state and federal legislation
7. To create and maintain a professional image of the Veterinary Technician
8. To provide for better and more humane veterinary medical care

EMPLOYMENT OPPORTUNITIES

Registered Veterinary Technician

- We are a small practice, started locally in 1933 and still privately owned and operated today.
- The owner of our hospital was voted Best Veterinarian in Ohio this year because of his knowledge and involvement in the community.
- We are extremely busy, we have 14 employees at the present time, included in that are 2 RVT and 2 Assistance.
- We have become busy enough to add on another RVT at this time.
- We are a small town, but not a small hospital.
- We do procedures most in the area never do, and Dr. John very much believes in utilizing his technicians for what they went to school for and are very well trained for.
- You are appreciated for your education!
